Django version 3.2.18, using settings 'mbti.settings'
Starting development server at http://127.0.0.1:8000/
Quit the server with CONTROL-C.
```

The screenshot shows a web browser window displaying the myMBTI website. The website has a header with "myMBTI" and two buttons: "MBTI Types" and "Our's Model". The main content area features the heading "Check your MBTI" and a subtext: "You can get the MBTI through only 10 questions(not a multiple choice). Express your thoughts freely through essay questions!". A large blue button labeled "Take the Test →" is centered below the text. At the bottom of the website, there is a row of six colorful, stylized illustrations of people in various poses. In the foreground, a terminal window is open, showing the command prompt and the output of the Django development server. The terminal output matches the text in the first block. The browser's address bar shows the URL "127.0.0.1:8000". The browser's tab bar shows several tabs: "GitHub", "Coding-Test-Study", "HYU Portal", "Programers", "Tistory", "Solved.ac", and "기타 북마크".
